

Everyone loses when you step on the track.

Hundreds of people each year unintentionally take on the railway and lose.

Be aware of the danger you can't see. Stay off the track and pay attention to any safety signs.

Is it worth putting your life on the line?

A horizontal band of yellow and black diagonal hazard stripes, commonly used to indicate danger or caution.

you step on the track**

You vs. Train

The railway is full of hidden dangers. If you're not hit by an unexpected train, you'll be hit by the lethal current in the rails and power lines.

You can't outrun a train. And even if you could, you wouldn't hear it coming, as today's trains almost silently reach speeds of 125mph. And they run 24 hours a day.

The power running through overhead railway lines is 100 times stronger than your supply at home – it's always switched on and nine out of ten people die when they're struck by it.

The only way to avoid danger is to stay off the track.
