

How to cross a level crossing safely.

**Stop
Look
Listen
Beware
of trains**

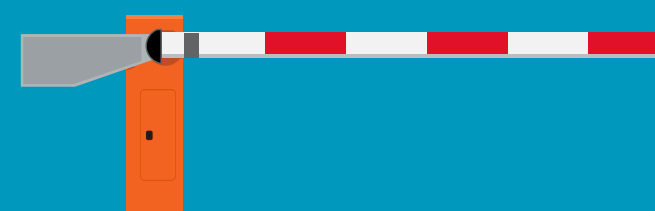

Stop, look and listen

Always follow the signs and instructions displayed at the crossing.

Warning lights

If warning lights are flashing do not cross until they stop – there may be more than one train coming.

Barriers

There are different types of barriers depending on the level crossing.

Stop when a barrier is lowering and do not cross until they are fully lifted.

Alarms and sirens

If you hear a warning sound or message, this means a train is approaching.

Please take care and make sure any sounds have stopped before crossing.
