

Weather Resilience and Climate Change Adaptation

Anglia Route Periodic Performance Report – 2018/2019 P6

Figure 1 provides an overview of the impact of different weather related events by day for period 6 in relation to delay minutes and PPM performance for Anglia route. If adverse/extreme conditions were experienced by one or more TOC during a week, a yellow or red dot will indicate the performance of the TOC(s) in question. Weather events don't always cause drops in performance (e.g. extreme rainfall may not flood the railway) and therefore, performance on adverse/extreme days can be higher than expected.
