

**Every level crossing is different, take time to read the signs and follow the instructions on how to cross safely.**

Ignoring them puts yours and others lives at risk. You could also be breaking the law.

There are countless near-misses and fatalities every single year. You, your friends and family must understand and respect the rules to cross safely.

# Myth busters

**Myth 1:** Trains don't run on a Sunday.

**Fact:** Trains run all day every day.

**Myth 2:** Trains can slow down if they see me.

**Fact:** 400 tonnes of steel travelling at 60mph takes over 320 metres to stop. No one can see you from 320 metres away, let alone stop a train.

**Myth 3:** In the modern day and with tip-top technology, barriers will automatically detect and alert me if a train is coming.

**Fact:** Barriers can't detect people or anything else that passes them. They are there to keep you a safe distance from a passing train.

**Myth 4:** Only one train passes at one time.

**Fact:** Trains run on all day every day, often two at a time.

**Myth 5:** The flashing lights are just a warning and mean I have plenty of time to cross.

**Fact:** The flashing lights mean a train is approaching, so you need to stop in a safe place behind the line.

# How do I drive safely over a level crossing?

## Concentrate

Always approach a level crossing with caution, particularly in adverse weather conditions. You never know when the lights will start flashing and you'll need to react accordingly.

## Drive slowly

Do not enter the crossing unless your exit is clear. Make sure there is enough space between you and the vehicle in front.

## Watch out for lights

If warning lights are flashing:

- Stop and do not cross
- Wait until the lights have stopped flashing.

## Watch out for barriers

There are different types of barriers.

- Do not race across as the barrier is coming down
- Wait until the barrier has fully lifted
- Do not weave around the barriers

Remember, there may be more than one train coming.
