

Introducing The Summer Collection for him and for her*

**If you notice changes to the size, shape or colour of moles or patches of skin, you should visit your doctor without delay. Better to be safe than sorry.*

There's nothing cool about exposing yourself to the sun and picking up one of these accessories. Skin cancer kills more people in the UK than Australia. The smart set are wearing at least SPF 15 sunscreen, lightweight PPE and are regularly checking their skin for changes.
