Safety & Workplace Supplies

Welcome to the Network Rail Protective Clothing Catalogue

Bodyguard Workwear have exclusively designed, developed and manufactured garments for over 40 years, with a constant focus on the end user's demands in a constantly changing work place.

We have enclosed the most Innovative and Dynamic portfolio of garments which have been specifically engineered to provide you with first class performance, comfort and optimum safety.

All of these products are available to the workforce via the Network Rail procurement process, however if you would like further clarification regarding product availability or sizing, then please contact your purchasing team.

For more information please contact PPE Help Desk.

Should you require any assistance in ordering special size garments please contact PPE Helpdesk in the first instance.

MEASURING GUIDE

In all instances, garment sizing information is located adjacent to the picture of the garment. Please note that some garments are not available in every size option and that size conversions can differ from garment to garment. Please read details directly from the table situated next to the garments you require.

The following instructions provide advice on how to take accurate measurements for each part of the body. There are two easy ways to obtain your correct measurements:

01 - If you already have High Visibility Workwear, that is comfortable after it has been washed, look in the label, and the size and fit should be visible.

02 - Simply follow the instructions below and ask a friend to measure the key dimensions as illustrated. It is important to note that you should always measure around the fullest part whilst wearing the undergarments that you would normally wear for work.

INSTRUCTIONS

Please check the MEASURING GUIDE to see if standard sizing workwear will fit you, if so please order the appropriate sizing through your normal channels.

If you require SPECIAL MEASURES please tick the relevant garments that you require which can be found on the GARMENT SELECTION form so the manufacturer knows what garments to make for you and then complete all sections in the BODY MEASUREMENT tab.

Completed forms should be sent with your order.

If you have any questions or require assistance in completing this form, please contact PPE Helpdesk.

The care instructions below are for information only. Please ensure your garments are not washed at home but are laundered using our contracted service.

- **Wash 40° MAX using Non-Biological products only**
- **Do not Bleach**
- **Do not Dry Clean**
- **Do not Iron Wet Weather Clothing**
- **Do not Dry over 60°**
- **Drip Dry if possible**

To prolong the Life Span of the clothing and to improve/maintain the performance of the garments, you **MUST**:

Wash regularly (weekly / bi-weekly) to maintain breathability and reflectivity. Badly soiled and dirty garments will reduce in breathability, hence leading to wearer discomfort.

Thoroughly dry out the garments daily to maintain breathability and waterproofing properties. Wet / saturated garments will not provide adequate protection if they are not dried out on a daily basis.

Turn the garments inside out and hang up to dry after each shift to provide comfort. Garments must be dried out at room temperature and **NOT** left in the back of a Van / Vehicle to dry as this will lead to a reduction in quality over a period of time.

Check daily for suitability, i.e. Cleanliness, reflectivity.

Fasten correctly to prevent rainwater entering the garments, i.e. Zip, Storm Flap and Collar.

NEVER use Biological cleaning agents, as these will damage the breathability and waterproofing properties of the garments.

DO NOT wash over 40° as this will also deteriorate the quality of the garment.

Failure to comply with the above advice will result in a deterioration of your clothing and will therefore not provide the maximum comfort and protection.
