

Safe Storage of Lifting Accessories

Key Points:

- Dedicated storage areas to prevent lifting accessories from becoming worn, damaged or excessively dirty when not in use
- Nominated person(s) to manage; store; issue and inspect lifting accessories
- Ensure regular 'thorough examinations' and test certificates available
- Visually inspected prior to use, look closely for 'Single Use Only' marking
- Worn or damaged equipment taken out of service and quarantined
- Equipment individually identified, tagged and colour coded stating the date of next inspection
