

# What are the benefits of VTS?

## Helps us to drive within the speed limit

The VTS provides an audible warning when the speed limit is exceeded. This gives the driver the opportunity to change their behaviour, slow down, and drive within the speed limit.

## Digital Vehicle Check

The digital vehicle check will replace the current paper forms. The vehicle check can be logged and sent through the VTS portal and will log faults with the vehicle, as well as letting the driver know if it is still driveable.

## Sat nav

The VTS portal includes full TomTom navigation including map updates. The navigation has built in audible and visual speed limits to alert drivers that they need to reduce their speed.

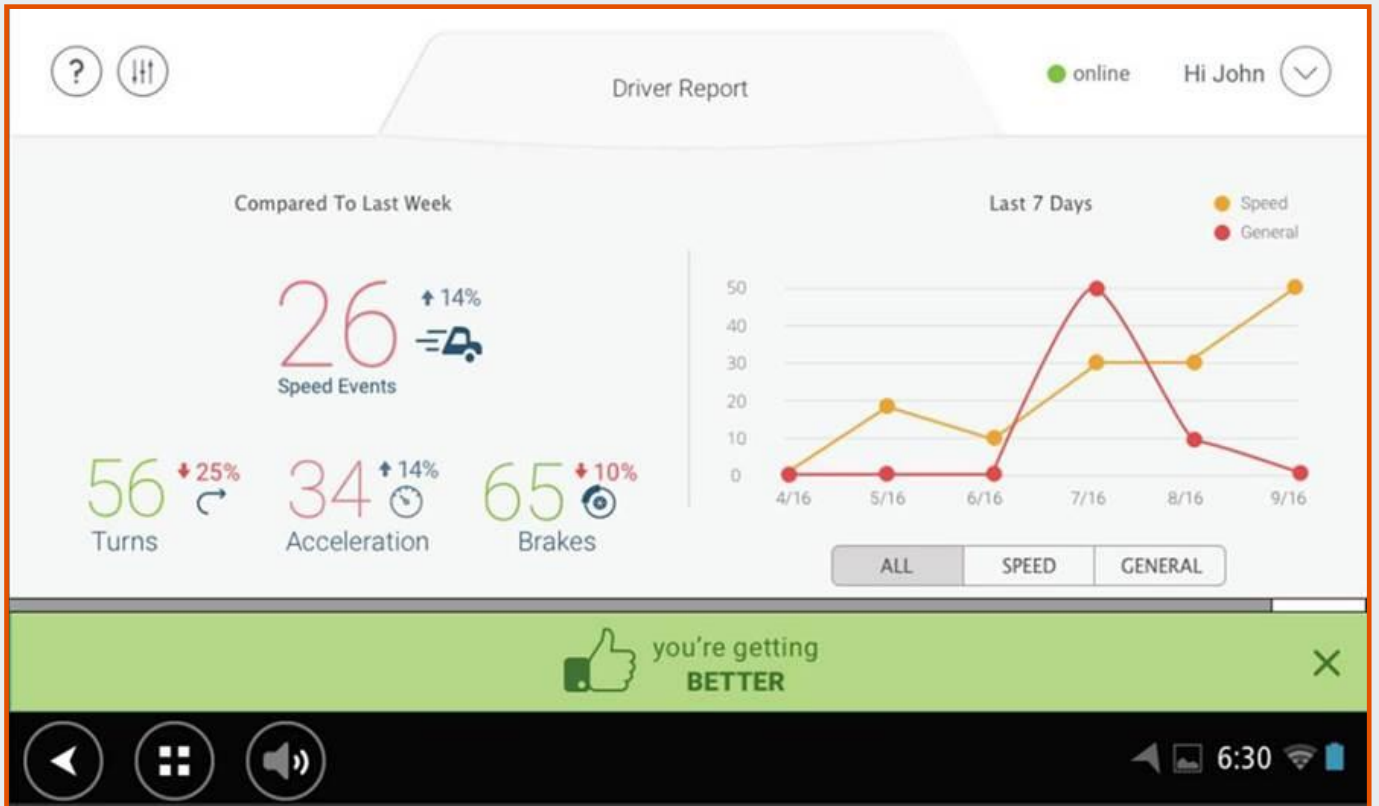

## I.C.E Panic Button

When pressed, the 'In Case of Emergency' button will notify the 24/7 team in an emergency situation, allowing your location to be identified and someone to respond to the call.

# What are the benefits of VTS?

## Driver portal

Your personal driving data can be accessed when you are logged into a VTS terminal.

Your driver report will provide you information on your

- Speed
- Braking
- Cornering
