

# *Investigators' Handbook*

## *Contents*

The colours used in the table below represent the colours used (see the covers and headers and footers) in the sections of the respective part of the handbook.

## Part 1 – Introduction

Section	Sub-sections
Introduction	Aims of this handbook
	What will make a good investigation?
	Standards
	Other useful publications
	Definitions
	The immediate post-incident investigation process
	Format of this handbook
	Changes to the handbook
	Appendix A – Definitions
Why investigate?	Moral
	Economic/Financial
	Legal
	Benefits to be gained from investigation
Cost of accidents	Accident pyramid
	The financial impact
	Covered by insurance?
	Costs to Network Rail

## Part 2 – The investigation

### Part 2A

Section	Sub-sections
Arranging the investigation	Checklist
	Date and time
	Venue and accommodation
	Attendees at the investigation
	Investigation team members
	Specialist adviser/expert
	Observers
	Witnesses
	Evidence collection and test results
	Appendix A – The role of the Network Rail Human Factors specialist
Preparing for the investigation	Contact the investigation team members
	What's needed for the investigation?
	Casual diagram/mind map
	Appendix B – Investigator prompts
Evidence	General
	Data protection
	Reconstruction
	Records of previous related events
	Audit/assurance activity
	Retention of evidence
	Appendix D – Typical list of evidence
	Appendix E – List of general evidence types
	Appendix F – List of evidence types for specific events

## Part 2B

Section	Sub-sections
During the investigation	Management of the investigation team and observers
	Aims and objectives of the investigation
	Who takes the lead?
	Interviewing witnesses
	Progress of the investigation
	Concluding the investigation
	New evidence
	Disputes/conflict of interest
	Timescale extensions
	Drafting the investigation report
	Agreeing the investigation report
Interviewing witnesses	Data protection
	Factors influencing interviews
	Memory recall
	Investigative interviewing approach
	Who takes the lead?
	Recording the witness interview
	If a witness refuses to give evidence
	Managing witnesses
Once the investigation is completed	Names document
	What happens to the report once its completed?
	Input to SMIS and report archive
	Review of recommendations and local actions
	Re-issuing reports
	Investigation file

## Part 3 – The investigation report

### Part 3A

Section	Sub-sections
General report writing skills	The report's purpose and target audience
	Writing styles
	Report structure
	Separating ideas and issues
	Templates
	Names
	Document control
	Using the correct terms
	Acronyms and abbreviations
	Dates
	Time
	Measurement units
	Quotation/speech marks
	Use of colour
	Quality control
Templates hints and tips	Templates for remits, reports and names documents
	Copying text from other documents
	Paragraph and formatting marks
	Keeping text, paragraphs and sub-paragraphs together
	Cross-referencing
	Pictures and diagrams
	Spelling and grammar

Section	Sub-sections
Writing recommendations and local actions	General
	Action already taken
	The scope of a recommendation or local action
	The wording of a recommendation or local action
	Assigning a recommendation or local action
	Where the organisation is not a Railway Group member
	Timescales for implementation
	Intention of a recommendation
	Repeating a recommendation or local action
	Costs of recommendations
	Signal sighting committee (SSC) recommendations

## Part 3B

Section	Sub-sections
Report – step-by-step guidance	Data protection
	General
	Report template
	Structure of a report
	Cover
	Event summary
	Remit (Formal Investigations only)
	Details
	Sequence of events
	List of evidence used (Local Investigations only)
	Summary of evidence (Formal Investigations only)
	Factors discussed
	Signatures
	DCP review and/or signature
	Appendices
	Incident factor causal analysis
	Feedback from consultation
	Appendix A – Guidance on information to include in the Details section
	Appendix B – Category A SPAD – Additional details to be included in the 'Factors discussed' section

## Part 4 – Causation

Section	Sub-sections
Accident causation theory	Domino theory
	The 'Swiss Cheese' model
	Task, Material, Environment, Workers, and Management
	Why? Because technique
	HFACS
Identifying the causes	Immediate cause
	Underlying causes
	Other safety related issues
	Why? Because technique
	Attributing the underlying causes to the 10 Incident Factors
Introduction to 'Human Factors'	What is 'human factors'?
	'Human factors' or Ergonomics?
	Why is 'human factors' important?
	Why human factors are important to investigations?
	Direct and indirect failures
	The 10 Incident Factors
Human error classification	The difference between errors and violations
	Generic Error Model for Rail
	Processing information and decision-making
10 Incident Factors	The 10 Incident Factors

## Part 5 – Investigation report management

Section	Sub-sections
Investigation report management	What happens to the report once it is completed?
	Input to SMIS and report archive
	Review of recommendations and local actions
	RRP
	NRRP
	Informing DCPs and lead investigators of RRP/NRRP decisions
	Investigation file

## Part 6 – External agency investigations

Section	Sub-sections
External agency investigations	Types of external agency investigations
	Single point of contact
	Documents/data
	Interviews
	Legal privilege
	External agency investigations where Network Rail is not the lead organisation
	Appendix A – Powers of ORR inspectors

## Part 7 – Accident reporting

Section	Sub-sections
Reporting requirements	RIDDOR 1995
	Reporting to RAIB
	Railway Group and Network Rail standards
	Accident report forms
SMIS	What is SMIS?
	SMIS data entry requirements
	SMIS safety event records
	SMIS Reporting and Recording Rules
	Linking of components and objects
	Causes
	Investigations and recommendations tracking
	Searching and analysis of SMIS safety event records

## Part 8 – Useful contacts

Section	Sub-sections
Useful contacts	Websites
	Publications, DVDs, etc.
	Useful tools
	Other sources of information
	Standard templates and forms
	Network Rail's Reporting and Investigation Manual
	Appendix A – Guidance on using the Fatigue & Risk Index

## Part 9 – DCP Guide

### Part 9A

Section	Sub-sections
General guidance	DCP's role and responsibilities
	DCP competence and training
	Investigator competence and training
	Monitoring and tracking of investigations
	Investigations – Identification and categorisation
	Investigations of 'serious accidents'
	The investigation remit
	Appointment of the lead investigator
	Appointment of the investigation team
	Observers
	Timescales
	Progress of the investigation
	Reviewing the draft report
	Recommendations and local actions
	Consultation for draft reports
	Completion/sign off of reports
	Publishing reports
	Release of information to third parties
	Investigation files
	Investigations led by organisations other than Network Rail
	External agency investigations
	Standard templates and forms
	Network Rail's Reporting and Investigation Manual
	Appendix A – Common problems with reports

## Part 9B

Section	Sub-sections
Remits – step-by-step guidance	Remit template
	Circumstances of the event unclear or disputed
	Cover
	General details, investigation team and observers
	General objectives
	Specific objectives
	Timescales
	Authorisation
	Remit consultation
	Appendix A – Specific objectives examples
