Infrastructure Group Safety Bulletin

Prohibition - Wolf 'Trakrat' Trolleys Models LT1000P & LT1250A (Ref IGS 206)

PROHIBITION LIFTED

This bulletin is for the attention of: IMDM's, Off Track Staff, Training, Maintenance Workforce HSE Advisors, All Network Rail Maintenance Staff

With reference to the Prohibition of these trolleys detailed in IGS Safety Bulletin 206, after investigation the derailment was found to be caused by the surface finish on the cast aluminium wheels. All 29 trolleys in service have had remedial work carried out to resolve this issue and all future trolleys supplied will have smooth wheels fitted when built.

The prohibition is therefore lifted

Issued by: Jim Allenden, Head of Plant (james.allenden@networkrail.co.uk)
