

Pricing Structure and Authorisation Summary for Physiotherapy

Physiotherapy Service Element	Price
Telephonic Clinical Assessment, including Guided Self Management advice and clinical case management	£56.00
Face to Face Physiotherapy – Initial Assessment	£53.75
Face to Face Physiotherapy – per follow up session	£38.00

If onward referral to physiotherapy with RehabWorks is recommended by OH Assist, then the additional cost for this would be **up to a maximum** of £299.75 “Delegated Authority” (Telephonic Clinical Assessment (physio) + Initial f2f assessment + 5 treatment sessions). The actual cost will depend on the pathway and number of sessions required, so for cases which are clinically appropriate for Guided Self Management, the cost will be limited to £56. Under certain conditions, further sessions of physiotherapy may be appropriate, but these will require individual authorisation to proceed on a case by case basis.

For further details please consult the RehabWorks/Network Rail Physiotherapy contract No. 3770609-02-44662.

Authorisation for onward referral to physiotherapy up to the Delegated Authority value is included when making a management referral to OH Assist and will be charged to the same cost code. Network Rail Route Management have agreed to this onward referral process to ensure that appropriate treatment can commence as soon as possible following a recommendation for physiotherapy.

For chronic, repeated or long term absence musculoskeletal cases, a Functional Restoration Programme (FRP) may be recommended. Authorisation to proceed to FRP assessment will be sought by RehabWorks on an individual case basis. Prices for FRP are noted within the contract and are available on request.
