**Industry Common Induction (ICI) & Sentinel Checks - NOTICE**

**FAO: Sentinel Primary Sponsor Administrators**

With the introduction and mandate of ICI this year, a change has been identified in the process that involves checking a Sentinel card. This notice informs Primary Sponsor Administrators they can now apply a 'card checker' status to nominated 'card holders' for them to check a person holds the ICI competency.

Previously, the 'card checker' status and authority to check ICI was limited to Controller of Site Safety (COSS) competency holders, however the process has been adapted to cater for multiple environments. For example, a Site Access Controller (SAC) - who is a Sentinel 'card holder' but does not carry the COSS competency - will now be able to check that an individual holds ICI, if they have been nominated to do so by their company.

To apply the 'card checker' status on nominated 'card holders', the Primary Sponsor Administrators need to login via the Sentinel website ([www.railsentinel.co.uk](http://www.railsentinel.co.uk)). They need to search for the Sentinel 'card holder', access their profile, tick the 'Can Perform Spot Check' box, and save the changes to complete the process (highlighted in yellow below).

The screenshot shows a user profile page with a sidebar menu on the left containing options like 'Details', 'Competences', 'Takedowns', 'Sponsor History', 'Employment History', 'Cards', 'Authentication', 'Medicals', 'D&A Screenings', 'Risk Assessments', 'Events', 'Track Visitor Permits', 'PPE', 'Notes', 'Log Book', 'Inductions', and 'Safety Briefings'. The main content area is divided into sections: 'Details' (with fields for Sentinel Number, Title, First Name, Known As, Surname, Date Of Birth, NI Number, Gender, Ethnic Origin, Office), 'Address' (with fields for Address Line 1-4, City, Postcode, Country, Phone, Fax, Mobile Number, Email Address), 'Card Check Status' (with checkboxes for 'Can Swipe Cards', 'Can Perform Spot Check', 'Is Non Operational', 'Can Confirm Site Inductions', 'Record Competence Usage', 'Can Confirm Safety Briefings', and a dropdown for 'Can Swipe Location Types'), and 'Emergency Contact' (with fields for Relationship, Name, and Phone). The 'Can Perform Spot Check' checkbox is highlighted in yellow. At the bottom, there are 'Save' and 'Cancel' buttons, also highlighted in yellow, and a timestamp: 'Created On 19/06/2013 10:41:04 by' and 'Last Modified On 02/11/2015 11:07:44 by'.

**Important note:** This new facility whereby nominated Sentinel 'card holders' can check ICI competency at a work site access point **does not replace the current process**. A COSS will still be required to swipe-in individuals with the Sentinel mobile app and check they hold the necessary competencies, such as Personal Track Safety (PTS), etc.

Please call the 24/7 Sentinel Helpdesk on **0330 726 2222** if you have any queries regarding this notice.
