The Infrastructure Projects (IP) National Level Crossing Programme Management Office (NLX PMO) would like to invite you and your colleagues to the 3rd Level Crossing Innovation Day at York WDC on Tuesday 26th June 2018.

It is a 'drop-in' event to showcase innovative products and services related to the development and delivery of level crossings and to get the level crossing community talking about innovation.

There will be stands and demonstrations of equipment such as cable theft deterrents, closed-circuit television (CCTV), lighting, lifting equipment, decking and fold down posts.

There will also be solar/wind powered products, cabinet bases, anti-trespass panels, batteries, a complete plug-coupled level crossing solution and other level crossing systems.

Furthermore, the day provides you with an opportunity to meet Network Rail teams involved in level crossings, learn about what they do and hear about their improvement initiatives and innovations.

This includes the Infrastructure Design Group, the Signalling Innovations Group and Supply Chain Operations.

The day will start at 10am and end at 3pm.

If you would like to come along, please let us know by [RESPONDING HERE](#).

Click [HERE](#) for further information and directions and please share with any colleagues you feel would benefit from attending - all are welcome!
